To Set up Email in Outlook 2007

1. Open Microsoft Outlook 2007. From the Tools menu, select Account Settings.
2. Click New.
3. Select Microsoft Exchange, POP3, IMAP, or HTTP, and then click Next.
4. Enter Your Name, E-mail Address, Password, and password confirmation.
5. At the bottom, select Manually configure server settings or additional server types and click Next.
6. Select Internet E-mail, and click Next.
7. Select IMAP for your Account Type. Use these settings for your incoming and outgoing servers:

Incoming mail server mail.carbonlogic.com

Outgoing mail server (SMTP) mail.carbonlogic.com

8. Enter Your Name and full E-mail Address.
9. Enter your User Name (your full email address) and Password, and select Remember password.
10. Click More Settings.
11. Click the Outgoing Server tab.
12. Select My outgoing server (SMTP) requires authentication and Use same settings as my incoming server.
12. Click the Advanced tab.
12. Under Incoming Server, for "Use the following type of encrypted connection" choose "SSL"
13. Next to Outgoing Server (SMTP), type 465.
14. Next to "Use the following type of encrypted connection" choose "SSL". Then click OK.
15. Click Next.
